

## UX-S LTE

**UX LNB Serie** guarantees an optimal signal reception and they fulfil every system requirements: from single distribution to complex multiuser or hospitality plants

- Maximum reception quality for all high definition programs
- A blocking filter for LTE (4G) signals has been incorporated to avoid interference with signals intended for mobile telephony; thanks to the integrated LTE filter, the LNB is immune to any interference due to LTE satellite band transmissions.
- Low noise figure and high reliability
- Small size
- Low consumption
- Some models are approved by Sky

### UX-S LTE

Code	287337
Description	Single LNB with 1 universal output and LTE shielding, <b>Sky Italy approved</b>
Outputs	1
Gain	60
Consumption	110
LTE protection	-54
