

UX-QT LTE

UX LNB Serie guarantees an optimal signal reception and they fulfil every system requirements: from single distribution to complex multiuser or hospitality plants

- Maximum reception quality for all high definition programs
- A blocking filter for LTE (4G) signals has been incorporated to avoid interference with signals intended for mobile telephony; thanks to the integrated LTE filter, the LNB is immune to any interference due to LTE satellite band transmissions.
- Low noise figure and high reliability
- Small size
- Low consumption
- Some models are approved by Sky

UX-QT LTE

Code	287302
Description	Quattro LNB with 4 separate H/V polarities outputs and LTE shielding, Sky Italy approved
Outputs	4
Gain	57
Consumption	160
LTE protection	-60
