

UX-QD LTE

UX LNB Serie guarantees an optimal signal reception and they fulfil every system requirements: from single distribution to complex multiuser or hospitality plants

- Maximum reception quality for all high definition programs
- A blocking filter for LTE (4G) signals has been incorporated to avoid interference with signals intended for mobile telephony; thanks to the integrated LTE filter, the LNB is immune to any interference due to LTE satellite band transmissions.
- Low noise figure and high reliability
- Small size
- Low consumption
- Some models are approved by Sky

UX-QD LTE

Code	287339
Description	Quad LNB with 4 universal outputs and LTE shielding, Sky Italy approved
Outputs	4
Gain	55
Consumption	150
LTE protection	-70
