

FOODMAX CTL 150

Product code: 264200201

Food grade emulsifying seamer fluid

Foodmax CTL is a high-performance problem solver for use in the canning industry. It is formulated to lubricate main turrets, bearings, chains and gears. Foodmax CTL provides viscosity control in the presence of water and excellent load-carrying properties and corrosion inhibitor to protect seamer components. It works as an emulsifier where contamination of the oil with water, juices and sugar may occur to eliminate free water to prevent from corrosion. Foodmax CTL is made of a high-quality paraffinic petroleum lubricating oil with ashless dispersant, rust and oxidation inhibited, anti-wear protection, non-foaming, extreme pressure protection and emulsifier.

Applications

Foodmax CTL 150 is specially developed for use in can seamers when a total loss emulsifying lubricant is required.

Benefits

- Foodmax CTL absorbs free water and juices and transports this to the recirculation tank for easy removal
- Foodmax CTL reduces contact staining which can lead to heavy pitting, rust & corrosion
- Foodmax CTL 150 is NSF H-1, Kosher and Halal registered for incidental food contact
- Stable emulsion
- Excellent lubricating properties
- Highly resistant to oxidation

Typical Performance Data

Property	Test Method	Value
Density @ 20°C, g/ml		0.87
Viscosity @ 40°C, cSt		150
Viscosity Index		118
Flash point °C		>200
Pour point, °C		<-15
Rust Test		Pass
FZG load stage		12
Kosher approved		Yes
Halal approved		Yes
NSF approval		157690
