

FOODMAX ANTI RUST 9

Product code: 264300501

Foodgrade Oil-based rust preventative

This product is a food grade high quality medicinal oil-based rust preventative that forms a thin oily film which provides long term protection to ferrous and non-ferrous metals. Foodmax Anti Rust 9 replaces non foodgrade (toxic) corrosion protection products when a non toxic (foodgrade) solution is required.

Applications

It is designed for applications where protection is required during indoor storage for periods of four to six months.

Typical applications are:

- Protection during storage of cutting discs and knives in for example the food packaging industry
- Protection during storage of moulds for plastic injection moulding (food packaging)
- Protection of finished machine components prior to packaging.
- Inter-operational protection of finished machined or ground metal surfaces

Use

It can be applied by brushing, dipping or spraying at a temperature of 5°C to 30.

Typical Performance Data

| Typical | Test Method | Value |
|---------------------------|-------------|----------------------------------|
| Appearance | | Transparent |
| Specific gravity @ 20 °C, | | 0.82 |
| Viscosity @ 40°C, gr/cm3 | | 2.5 |
| Type of film | | Oily |
| Flash point, °C | | 75 |
| Indoor storage, months | | 4 to 6 |
| Removal | | By solvents or alkaline cleaners |

All performance data on this Technical Data Sheet are indicative only and can vary during production.
