SUBJECT: Parameters of quality of glass blocks according to EN 1051-1

Kindly see below the product specification according to European norms concerning glass blocks in class 1:

Angles:	$90 \pm 2^\circ$
Dimensions:	tolerances up to ± 1 mm
Bulging:	≤ 2 mm
Bend:	≤ 1 mm
Optical issues:	should be invisible from the distance 3 m (bubbles and other non-homogeneities in glass around 1 mm in diameter)

Glass blocks in tolerances of above mentioned parameters are considered as standard quality of production and should not be used as a reason for claiming.

Thank you for your understanding.
