in your car  
car seat-to-vehicle fit guide

## GB Vehicle Fitting Information

The Joie child restraint with base is classified for "Semi-Universal" child restraint system use. It is suitable for fixing into the seat positions of most cars. The figures on the diagram below correspond with the vehicle fitting positions listed in the following pages.

Seat positions in other cars may also be suitable to accept the infant child restraint. The following Vehicle Fitting Information is only for vehicles sold in European markets. If in doubt, consult either the infant child restraint manufacturer or the distributor.

**ALWAYS** give priority to the rear seats of your vehicle.

**DO NOT** fit your child restraint onto a vehicle seat fitted with an airbag, unless it can be deactivated.

If your infant child restraint can be fitted, it is marked with •

If your infant child restraint can not be fitted, it is marked with ✗

If your vehicle is not listed in this manual or it is not marked with either a • or ✗ then please refer to your vehicle's handbook or contact the manufacturer for further information.

This is a "Universal" child restraint. It is approved to Regulation No. 44, 04 series of amendments, for general use in vehicles and it will fit most, but not all, car seats.

A correct fit is likely if the vehicle manufacturer has declared in the vehicle handbook that the vehicle is capable of accepting a "Universal" child restraint for this age group.

This infant child restraint has been classified as "universal" under more stringent conditions than those which applied to earlier designs which do not carry this notice.

If in doubt, consult either the child restraint manufacturer or the retailer.

Only suitable if the approved vehicles are fitted with 3 point retractor safety-belts, approved to UN/ECE Regulation No. 16 or other equivalent standards.
