Become Plastic Neutral Now

Plastic Waste Problem

An average person creates approximately 50 kilos of plastic waste every year / approx. 4 000 to 5 000 kilos during a Lifetime.

Only about 10% percent of Your plastic waste is recycled. Most of it is dumped into landfills, gets burned or ends into the oceans.

The solution to this is to become Plastic Neutral. Now.

Being Plastic Neutral

Being plastic neutral means, that for every amount of plastic that you as a person have thrown away, an equal amount of plastic waste is recovered and removed from the environment.

The Journey of a Thousand Miles, begins with a Single Step.

It all begins with each of us taking that first step ourselves.

Become Plastic Neutral Now.

Corsair Group offers a Solution to the Pollution.
By using an environmentally friendly method of
chemical recycling, Corsair turns the plastic
waste into Advanced Bio-oil.
